

Alternative Non-Toxic Cancer Treatments

with Dr. Derek Rodger

The four main causes of death in the U.S. are heart disease, cancer, diabetes and Alzheimer's. Dr. Derek Rodger (ND) will explain why this is happening and what you can do to lessen your chances of being diagnosed with these diseases. He will discuss why your medical doctor may not inform you of alternative non-toxic cancer treatments. After losing his sister to cancer and later reading a report published in the Journal of Clinical Oncology that stated chemotherapy, radiation and hormone blocking drugs fail 97% of the time, Dr. Rodger (ND) decided to go back to school and became a Naturopathic Doctor. In his Clinton and Flemington based practice, "2nd Opinion, Non Drug Health Solutions", he uses science-based, clinically verified, holistic medical nutrition and herbs.

Thursday, July 27 at 7:00 pm

Hunterdon County Library

314 State Route 12, Flemington
