

NATIVE PLANT SOCIETY OF NJ

HUNTERDON CHAPTER

Tuesday, February 20 at 7:00 pm
North County Branch Library
65 Halstead Road, Clinton, NJ

Camouflaged Looper (Synchlora aerata)

Swamp Milkweed Beetle (Labidomera clivcollis)

Photos by Randi Eckel

Native Plants and the Creatures that Love Them by Dr. Randi Eckel of Toadshade Wildflower Farm.

A discussion of who eats what!
Which plants are favored by butterflies
(and caterpillars), birds, wildlife and
people...and how we can
support and encourage beautiful
wildlife in our gardens.

Everyone is invited - you do not have
to be a Hunterdon resident.

The program is free.

RSVP hunterdon@npsnj.org,
if you plan to attend.

Dr. Randi Eckel

is the owner and founder of Toadshade Wildflower Farm, an all-native mail order nursery. A life-long naturalist, Randi has studied plant, disease, and insect interactions for over 30 years starting at the University of Delaware, University of Maryland and North Carolina State University and continuing through her work at the USDA and now as owner of Toadshade Wildflower Farm.

About Toadshade Wildflower Farm

Randi Eckel started Toadshade Wildflower Farm to make native wildflowers, particularly perennials, more easily available. The intention is to 1) provide native, perennial, propagated wildflower plants, 2) identify available plants clearly by both common and scientific name, and 3) clearly summarize the native range and growth requirements of the wildflowers for sale. Accordingly, all of the plants that Toadshade offers are native not alien, introduced, or naturalized. They propagate all the plants - no plants are dug from the wild.
