

Cause & Effect: Changing Climate in NJ

with Dr. Krassi Lazarova of Centenary College

Climate change will effect New Jersey with rising sea levels, hotter summers, inland flooding. Natalie Mahowald, of Cornell University, said that global warming is going to be one of the main things that dictates how people will live in the near future.

Dr. Lazarova received her PhD in physics 2001. Her primary research focus was on numerical modeling of air quality. This included pollution release and studying the consequences of the release on air quality.

A Meet and Greet will follow the talk.
Sierra Club meetings at are open to all, so feel free to sign up or drop in.
Refreshments will be available.

Wednesday, February 6 @ 7pm

North County Branch Library 65 Halstead St. Clinton, NJ
