

INDEX – BEERS ATLAS OF HUNTERDON COUNTY (1873)

NAME	PAGE	MAP	TOWN	District/ Street	Location/
* indicates number of properties.				BN= Business Notice	Business

This index to the 1873 Beers *Atlas of Hunterdon Co.* is mainly the work of Carol Schwartz, a volunteer at the Hunterdon County Library. It covers every personal name shown in the atlas. The first column shows names, the second column shows the page number in the Atlas. The third column shows the title of the map where the name is found, and the fourth column shows the township or borough. The fifth column shows the street, if given, or the number of the School District in which a name can be found; unfortunately the map makers sometimes neglected to put in the district number, so we can only put in “No. ??” If a Business Notice, i.e., an advertisement, was paid for, it is indicated by “BN” and the text of the notice is given. The sixth column gives a little more help in locating a name in a map, by giving the block location on a street or by giving general location within a map – left, right, upper, or lower.

This index, in conjunction with the digital images from the *Atlas*, should make for easier searches of individuals by genealogists and local historians.
